Speakers & Topics

James Vaiana, DDS **ISOMS Program Chair**

Discussion on Office Anesthesia Techniques and Use of Antibiotics

Dr. James Vaiana, who practices in Peru, IL is a past president of ISOMS, and has served as ISOMS Program Chair for over 20 years, with Dr. Leslie Heffez as Co-chair for the past 10 years. After opening remarks, covering Anesthesia Topics, including some unique and challenging conditions, open discussion will be welcomed.

Nathan D. Schroeder, DMD, MS, FACS **The Role of Dexmedetomidine in Oral Surgery**

The presentation will outline the basic pharmacodynamics of Precedex/dexmedetomidine, FDA approved uses of the drug, and the role of the drug's use in ambulatory anesthesia as typically performed in the oral and maxillofacial surgery office. Risks, benefits and dosing of the agent will be highlighted with data presented in scientific format and bolstered by the clinical experience of the speaker.

Michael Stroncsek, DDS, MS **Risk Management Issues** **Director, OMS National Insurance Company**

Dr. Michael J. Stroncsek is a Board Certified Oral and Maxillofacial Surgeon who practices in Fort Wayne, Indiana. He did his undergraduate training at the University of Notre Dame. He received his dental degree from Indiana University and completed his residency and Master's program in oral and maxillofacial surgery at The Ohio State University. Dr. Stroncsek is certified as a Diplomate of the American Board of Oral and Maxillofacial Surgery. Dr. Stroncsek previously served on the Committee on Anesthesia for AAOMS, acting as Chairman of the Committee for his last two years. Dr. Stroncsek then sat on Committee H for the ADA. He was a member of the OMSNIC Claims Committee. Dr. Stroncsek is currently a Director of OMSNIC and the Chair of the Patient Safety and Risk Management Committee.

Dr. Stroncsek has nothing to disclose.

Those insured by OMSNIC will be eligible for a premium discount for one policy period for attendance at this program.

Speakers & Topics

James Murphy, DDS, MD, FACS
Challenging Orthognathic Cases -
Case Based Discussions

Orthognathic surgery patients are a diverse group. Transverse discrepancies, orthognathic first approach, the patient with condylar resorption, hemimandibular hyperplasia, and the patient with obstructive sleep apnea can prove to be more challenging within the realm of orthognathic surgery. Case-based examples of these cases will be discussed with a view to stimulating audience involvement and interaction.

Attending Physician: Division of Oral and Maxillofacial Surgery, Cook County Health, Chicago

Assistant Professor: Division of Plastic and Reconstructive Surgery, Rush Medical Center, Chicago

Sunil P. Sinha, DDS
Yomi; Are You Ready for the Robotic Future?

Advances in technology help us provide better care for our Patients. We often have to make decisions whether to implement these new technologies in our office. Yomi dental implant robot is one such technology. The Yomi robot combines advanced technology with the expertise of the OMFS to enhance implant procedure. Using Yomi Dental Implant Robot helps improves precision, efficiency, enhanced planning, safety with a minimally invasive approach. Our private practice has been using the Yomi robot for close to 2 years.
